Classified as a National Monument, this monastery was erected in the 9th century. There are still traces of medieval architectural elements, such as the Romanesque capitals in the chapels of the cloister. Immersed in a green valley, the monastery enjoys a rural, bucolic and quiet environment, near the Mondego river and the city of Penacova, and thirty minutes from Coimbra. The church and one of the cloisters were recently restored and open to the public. All the remaining area, include the beautiful and vast garden, will be affected to the REVIVE Program.
